To Mayor and Council of the Town of Rimbey,

Sept. 4, 2024

Dear Ladies and Gentlemen,

Re: Ongoing discussion/negotiation regarding septic lagoon decommissioning on Grutterink property

From: Stakeholders – Herb and Judy Grutterink, Earl and Francine Repas, Mark and Tammy Grundy.

We would like to thank council in advance for considering the following. After two and a half years of investigating legalities, then working through possible options, negotiation and discussion, we the stakeholders have a consensus on how we would prefer to proceed to deal with the sewage effluent from the Grundy and Repas residences.

A connection to the Town sewage utility by way of a private easement along the Grutterink property, south of the residences, to Rimstone Drive would be the preferred option. A private easement with maintenance being the responsibility of the homeowners was chosen because a municipal service would be cost prohibitive. The septic tanks at both residences will remain in use, thereby continuing to process the raw sewage. The liquid offtake would then need to be pumped through a small, low pressure line to the connection at Rimstone. Pumping is required as there is insufficient slope for a gravity line. These low pressure, small diameter, liquid only sanitary lines are widely used and accepted in many municipalities and are relatively low maintenance.

Although we have agreed on what we think is our best option to connect to the town system, we still have a challenge. When Rimstone was built the infrastructure services were built with water lines (including fire hydrant), gas lines and asphalt extending to the very end of Rimstone Drive at the Grutterink property line. Mr. Craig Douglas, CAO, was able to confirm (through Public Works) that the sanitary sewer main does NOT extend to the property line, but is instead stubbed just west of the last manhole where the Manor is serviced from. Our understanding is that the residential lots on the north side of the street are connected by extended service lines that connect to a sanitary barrel (as opposed to a shorter, more typical connection).

A connection such as what we propose would normally be connected to a manhole, or at least a cleanout at the property line, thereby providing a clear division between municipal and private systems. The last three months have been spent researching our options for a connection with the CAO, the Development Officer, and no less than three engineering firms. Though all have been helpful, we do not have the expertise to know that questions to ask, what the engineering requirements are, and what the Municipal and Provincial rules are to find a workable way to connect. So, what we are asking of council is to draw on Town resources to find a workable and affordable way forward, and to provide a

connection for our homes. We are part of the Town, and should be connected to the services. We are not asking for a connection at our property line, but only to the right of way on Mr. Grutterink's property. The service will only be for a pair of two inch lines containing liquid only, so it should be considerably easier to deal with than a couple large lines with solids.

We have already incurred considerable expense and have spent hours and hours to try to find a solution. We still have more expenditure of time and money ahead of us. In addition to legal fees already incurred, we will need to invest in the following. The cost for materials and for the trenching contractor to install the lines is estimated at \$15,000-\$20,000, the reclamation of the lagoon could be in the \$8000 range, we will need to spend several thousand more on fees for agreements, registrations of the survey and the easement, a development permit, pumping equipment, and likely some engineering and other further legal expenses. This is in addition to ongoing costs for septic trucks and Town utility bills. It is our understanding that the Rimstone Manor was an undertaking of the Town, the County, and Rimoka Housing, on a cost shared basis. Should a septic connection be cost shared? It would appear that most municipal developments are built with the next development in mind. This would seem evident by the fact that all the services except sewer are extended to the property line. We don't know why the sewer line was not, but if there is a way for us to move forward with a Town sewer service, we would be grateful for your help in securing it.

Thank you once again for your attention and assistance with this matter.

Sincerely,

Signed;

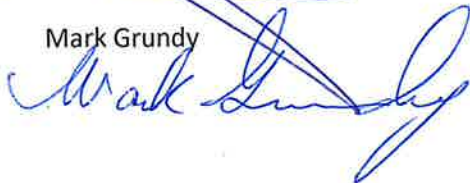

Herb Grutterink

The situation is that as a resident for over 10 years, I wonder why I must shovel & chip ice on the sidewalk next to the street. It limits me to having a holiday and it costs me \$23.⁰⁰/hour to hire my yard caretaker to do it if he's available. I am alone, and in summer I have to pay him to mow the grass next to the street. Pet-friendly salt is expensive these days to keep people going by.... SAFE to not slip & fall. As it soon is fall, I was hoping for a town utility bill credit. I'm sure the other residents would appreciate that as well. ... Nancy Selent. ♡

Good day Craig!!! I am emailing you on behalf of the Rimbey Elementary School Council. We would love to have the Town of Rimbey participate in this event again this year. Last year it was such a wonderful community event. Thank you in advance for bringing this forward and considering.

Dear Town of Rimbey and council,

It is our great pleasure to announce that we will be hosting our annual Rimbey Elementary School Chili Cook Off at Paskapoo park, on September 19, 2024. We are inviting you to join in on the fun and some friendly competition by bringing a pot of your chili down to Paskapoo park and giving other local businesses and community members, a run for their money as you compete to win the title as Rimbey's number one pot of chili. How it works: Let us know by September 11th if you will be entering a pot of chili. Then bring your pot down to Paskapoo park prepared to serve it to our guests/voters for 5:00pm. You are welcome to set up your station with small advertising (signage, program info, business cards and decor). We will sell tickets and voters will sample each chili. They will have one ticket to place in their favorite chili makers bin. At the end of the evening, 6:45pm, the tickets will be counted and 1st, 2nd and 3rd place winners will be announced! If you are interested in supporting this event but unable to donate and participate with a pot of chili we would gladly accept and greatly appreciate donations of small bowls or cups, plates, cutlery, napkins, condiments for the hot dogs and smokies we will be serving or drinks (coffee, hot chocolate, bottled water, juice boxes and pop) that we will have for sale. This is a wonderful community event and a great fundraiser to go towards our outdoor classroom project at the Rimbey Elementary School, and we are looking so forward to it. If you have any

questions or would like to submit a pot of chili or a donation please do not hesitate to contact Kelly LeBlanc ([REDACTED]). Thank you for your time and consideration.

Sincerely,

TO WHOM IT MAY CONCERN:

RE: Green Compost Bins

While composting is a noble effort undertaken by the Town it is not a viable option for everyone, thus please refer to the following complaint regarding the Green Compost Bins.

Several owners of Condo Units in Legacy Lane have contacted Rimbey Town Office and the Maintenance Office to lodge our complaints regarding the blanket distribution of the Green Compost Bins but as yet, no satisfactory resolution has been forthcoming.

Those of us who own/live in condominiums in Legacy Lane do not have the space to accommodate the large garbage bins along with a compost bin. Our patios are small with just enough room for a couple of pieces of outdoor furniture and there isn't room to accommodate the 2nd large compost bin. We also have concerns about the unpleasant odours and attraction of insects associated with the form of composting set forth by the town.

Although we own our condos, we have a very limited perimeter around our units. The maintenance of our lawns is contracted out and we have no grass clippings or other refuse associated with yard maintenance. The compost bins are virtually useless to us, not to mention the additional cost associated with these bins.

Because we have a number of extenuating circumstances associated with your composting program regulations, we respectfully request that the Mayor, Town Council and Staff revisit the bylaw to come up with a solution to cover all members of the Municipality.

Thank you for giving this your prompt attention.
